***How to Determine the Number of Persons
Practicing Law on Behalf of the Law Corporation**

“Persons practicing law on behalf of the law corporation” means persons with whom the law corporation has established a law practice relationship of a continuous nature OR who are held out by the corporation as being available to practice law on its behalf. This includes all attorneys practicing in a partnership (including a limited liability partnership, or LLP) or association in which the corporation practices; employees; “of counsel”; contract attorneys; part-time attorneys and persons who practice law on behalf of the corporation in other jurisdictions, even if such attorneys are not admitted to practice law in California.
