

The State Bar of California
Offsite Business Records Storage
Request for Proposal: Questions & Responses

October 17, 2007

1. **Our storage facilities are not environmentally controlled as requested in section III. H. of the RFP. How shall I respond?**

We will consider both environmentally controlled and environmentally uncontrolled facilities. If you offer both types of storage facilities, please indicate and, if monthly storage rates differ, quote both the controlled and uncontrolled storage options. If your storage facility is not environmentally controlled, please specify the average range of ambient temperature and humidity levels and that it is not artificially maintained and files will be subjected to the prevailing outside temperature and humidity levels at the facility address listed in your proposal.
