

The State Bar of California  
**IBM AS400 Migration to i5**  
Request for Proposal: Questions and Responses

- 1. The RFP states there are 2 9406-720 systems but I only noticed one S/N.**

*See number 3.*

- 2. Since (1) 525 express box is being sourced and it mentions that there is a need to have and HA/DR (Backup) box. Do you want the run just High Availability Backup between 2 partitions on the Box?**

*High Availability (HA) would be achieved by backing up to a different partition on the same 525 box and then to tape to avoid service interruptions.*

- 3. What is the main application on each one of the 720's.**

*See page 2 and three for the serial numbers, configuration and major Applications served on each of the current Servers.*

- 4. We will also need to know where the configuration of the 525 came from. IBM direct or another Partner? (Name Partner).**

*The Configuration was derived from a listing given by a Certified iSeries support vendor.*

- 5. The on page 9 of the RFP, it lists that a “Three Year 24x7 Software Maintenance, P20 Processor Group”.**

*This should be changed could be changed to a " Three Year 24x7 Software Maintenance, P10 Processor Group" to reflect the corrected Processor group on the 525 system.*

# The State Bar of California GEORGE

## Hardware

Single Processor  
768Mb RAM  
90GB Disk Storage  
3590 - 300GB Tape Drive  
V.35 Comm. Adapter  
Local Twinaxial w/s controller  
Token-ring adapter  
Ethernet adapter

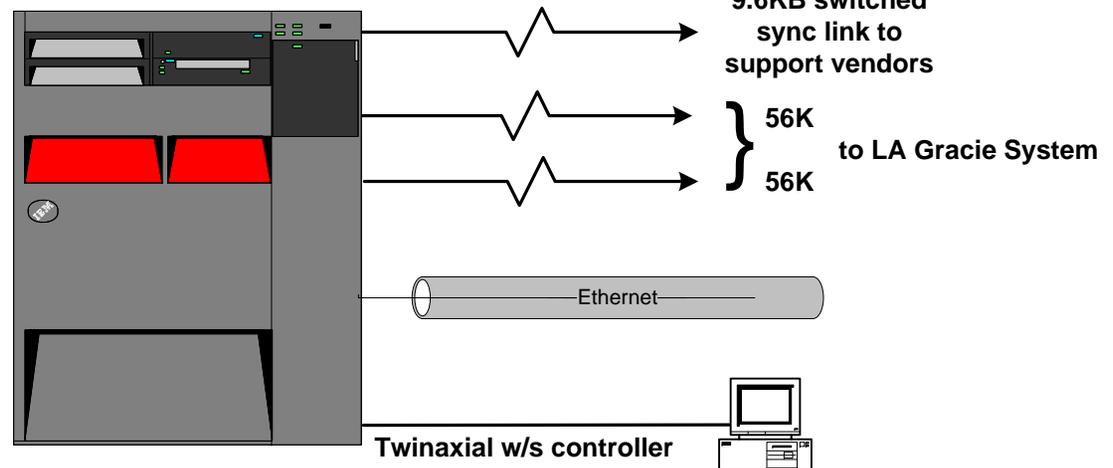

## Business Applications

Membership  
Meeting Services  
Finance  
Admissions  
Human Resources

## Operating System Applications

Performance Tools/400  
RPG  
Query/400  
Client Access/400  
TCP/IP Connectivity/400  
AFP-Advanced Function Printing  
ASI-Websphere  
STI-SQL  
OfficeVision/400

## IBM AS/400 Model 720

**OS/400 V4R4M0  
S/N 102B21D**
