

# State Bar Court Case Management System

## Request for Proposal: Questions & Responses

August 28, 2012

- 1. Attachment G: Data-Sharing Details In regards to this attachment – what are you looking for from the Vendor? How are we to respond?**

*Attachment G provides the data sets needed for typical data exchanges with our other systems and vendors should ensure that these data sets are accommodated when proposing interfaces. This attachment is referenced in the Automated Interfaces tab of ATTACHMENT F: Functional Requirements Compliance Matrix.*

- 2. Regarding #10.d. – Hardware Installation (page 12). We would like to know whether or not the State Bar is looking to have the Vendor install the recommended Hardware or if the State Bar has other plans. If so, would the Hardware be installed in a total of 3 places (Data Center, Los Angeles, and San Francisco)?**

*The Bar is not requesting that the vendor install equipment. However, the vendor's proposal "must fully describe the tasks, schedule, and resources required to install the hardware that supports the proposed solution". The State Bar will install the required hardware based on that description.*

*There are only two State Bar locations: San Francisco and Los Angeles. Our primary data center is in the San Francisco location. However, if an optimum installation requires hardware in Los Angeles as well, this can also be accommodated. The State Bar will determine the best installation approach based on your recommended hardware configuration.*
